Master Thesis – How to Organize and Lead Teams in Multi-Site ICT-development

Background
In our diverse workplace there are teams working at multiple sites around the globe. Both in the sense that teams that deliver to the same project are located at different sites and in the sense that the different team members in one team are located at different sites. At the same time as this gives advantages such as a wider recruitment pool and a more diverse ideas it also comes with some difficulties such as misunderstandings in communication.

Thesis Description
We would like the student to state what difficulties that the organization face and what could we do to ease or remove those.
The thesis will be concluded with a result presentation for the Ericsson research team.
