

PhD Workshop @ ISY 2024

27 August

ACTIVITIES

On 27 August 2024 there will be a full-day workshop for PhD students in Electrical Engineering at LiU where the students can present their current or planned research. The workshop offers an excellent opportunity for the attendees to share findings and ideas with colleagues and learn about ongoing research activities at ISY. Student talks are given in Ada Lovelace and posters are presented in Visionen, both places located in building B at Campus Valla. Senior PhD students may apply for chairing a session at the workshop and could thereby gain experience that will be useful at external conferences.

To support the workshop activities, two short PhD courses, worth 1.5 hp each, start ahead of the workshop. The courses are open for LiU students, where the first is aimed at presenters, and the second at students who wish to chair during the workshop. Deadline for signing up on a workshop course is *14 June 2024*. Please contact [Mark Vesterbacka](#), who is responsible for the presentation course, or [Michael Felsberg](#), responsible for the chairing course, if you have questions on the respective course.

CONTRIBUTIONS

To encourage high-quality presentations, a student contest will be held where the prestigious "Best Presentation ISY 2024" award can be won. Submissions and sign-up for participation will open on ISY's internal web on 1 June 2024. Prospective presenters should submit a 1/2 — 1 page abstract on their current or planned work by *14 June 2024*. Abstracts, talks, and posters should all be presented in English.

PARTICIPATION

We welcome all audience that are interested in current activities at ISY, whether you are faculty members, students, or external to us. To be eligible for lunch and refreshments during the breaks, we ask faculty members and students to sign up for the workshop on the internal web by *14 June 2024*, and external guests by sending your contact information to the Director of PhD Studies at ISY.

We hope to see you all at the workshop!

CONTACT

You may contact the Director of PhD Studies at ISY, [Mark Vesterbacka](#), regarding event matters.
